

I'm not robot!

The results of AIChE's biennial salary survey are in, revealing positive advances for the chemical engineering profession. The median annual salary of respondents to the 2019 survey is \$126,000 — a 1.6% increase over the 2017 median of \$124,000. In comparison, the previous survey reported a 2.4% decrease in median salary between 2015 and 2017 (Figure 1). The increase in median salary is part of an overall trend of rising salaries. In 2000, chemical engineers earned a median annual salary of \$77,200 — since then, salaries have risen steadily. This development can be attributed to a variety of factors, including inflation and economic growth. This year, we took a closer look at recent graduates, i.e., those entering the workforce in 2016, 2017, and 2018, in an attempt to understand the transition from student to young professional. The median starting salary for chemical engineers beginning their careers is \$68,000, compared to a median salary of \$72,000 for all respondents under the age of 26. On average, it takes recent graduates around five months to obtain employment after graduation. Median salaries range from \$71,000 for respondents with less than three years of experience to almost \$165,000 for respondents with 40+ years of experience. Many other factors, including age, gender, education, and job function, influence salaries. How to Start a Survey Business Why Are Salary Grades & Salary... If one had to disclose either, which would he or she choose? According to a recent MyBankTracker survey, the majority of women are more comfortable revealing their weight than their salary. However, compared to men, women were more transparent about their salary. Here are some of the notable highlights of the surveys: Highlights 63% of women would rather reveal their weight compared to 37% of men who would rather reveal their salary Generally, as age range increased, female respondents were more comfortable revealing salary than their weight Of the different age groups, females age 35-44 were most likely (60.71%) to have, at one point, been paid less than a male coworker with the same experience 80% of men would rather reveal their weight compared to 20% of men who would rather reveal their salary (Women) Would you rather reveal your weight or your salary? Age Salary Weight 18-24 40.79% 59.21% 25-34 33.75% 66.25% 35-44 36.53% 63.47% 45-54 36.11% 63.89% 55-64 37.80% 62.20% 65+ 40.22% 59.78% Grand Total 37.28% 62.72% (Men) Would you rather reveal your weight or your salary? Age Salary Weight 18-24 19.40% 80.60% 25-34 19.14% 80.86% 35-44 24.05% 75.95% 45-54 17.86% 82.14% 55-64 16.90% 83.10% 65+ 20.97% 79.03% Grand Total 19.55% 80.45% (Women) Have you ever been paid less than a male worker with the same experience? Age Yes No I prefer not to say 18-24 44.03% 42.54% 13.43% 25-34 46.58% 42.24% 11.18% 35-44 60.71% 29.76% 9.52% 45-54 54.82% 38.07% 7.11% 55-64 56.18% 38.76% 5.06% 65+ 46.11% 45.00% 8.89% Grand Total 51.77% 39.29% 8.94% Bridging the Gender Pay Gap The gender pay gap has long been a contentious topic with no clear solution in sight. Being paid less can result in a long-term disadvantage of reduced growth of savings and investments. It emphasizes the need for women to put themselves in the best financial position possible. This means ensuring that they stick to the cornerstones of financial wellness. Establish emergency savings A financial buffer is crucial to prevent an unexpected expense from devastating one's finances. With an emergency fund, you don't have to resort to expensive options (e.g., high-interest credit cards, payday loans, etc.) to pay for a financial emergency. For many, investing is considered complex and scary. However, historically, the stock market has generated average returns that are significantly higher than low-risk savings instruments. By investing early and consistently, your money has the opportunity to recover from major economic downturns and to experience returns in the long run. With choices such as index funds and robo-advisory services, investors can build diversified portfolios easily. Take advantage of retirement accounts Retirement accounts offer tax-advantaged growth of long-term savings but far too many people -- regardless of gender -- ignore them. Whether it is an employer-sponsored 401(k) plan or IRA, savers can either make tax-deductible contributions or enjoy tax-free withdrawals during retirement -- both of which allow savers to maximize their retirement savings. Methodology The study was conducted through Google Survey on behalf of MyBankTracker from February 3, 2021 to February 9, 2021 with 971 female respondents in the United States of ages 18 and up with a standard deviation of +/- 5%. The study was conducted through Google Survey on behalf of MyBankTracker from February 12, 2021 to February 14, 2021 with 1,018 female respondents in the United States of ages 18 and up with a standard deviation of +/- 1.8%. The study was conducted through Google Survey on behalf of MyBankTracker from February 11, 2021 to February 19, 2021 with 982 male respondents in the United States of ages 18 and up with a standard deviation of +/- 5%. University of Michigan Professor Nancy Love will present this lecture on Sept. 25 as part of the American Academy of Environmental Engineers and Scientists Kappe Lecture Series. Wayne Lee with the Outstanding Contribution to KSEA Award. Continue reading "Korean-American Scientists & Engineers Association Honors Professor K. Wayne Lee" According to a Parkinson's Foundation study, 1.2 million people in the United States will have Parkinson's disease by 2030. A smart glove that can collect data based on the movements of those living with the disease and other movement disorders is being developed by URI Associate Professor Kunal Mankodiya. Continue reading "Smart Glove to Help Doctors Treat Patients with Parkinson's" James Miller, professor of ocean engineering at the University of Rhode Island, was a guest panelist for the Naval Undersea Warfare Center (NUWC) Division Newport's Advanced Naval Technology Exercise (ANTX) on Aug. 28. The professor spoke about the role of academia, specifically the ocean engineering program at URI, plays in preserving knowledge of technology across generations. "Since the [...] Continue reading "URI Engineering Professor is Panelist at Navy Technology Event" Applications are invited for a tenure-track position in Computer Engineering at the rank of Assistant Professor beginning in Fall 2020. We are seeking candidates in computer engineering with expertise in security or privacy in cyber-physical systems, but outstanding candidates in all areas of Computer Engineering will be considered. This include but not limited to computer systems or architecture, networking, [...] Continue reading "Tenure-Track Assistant Professor of Computer Engineering" URI Assistant Professor of Ocean Engineering Brennan Phillips and a team of researchers discovered fish in the depths of the sea off the Solomon Islands in the South Pacific that were using bioluminescent flashes for "schooling." Continue reading "'Flashlight Fish' Discovered by URI Professor and Research Team" Amgen Seminar Series in Chemical Engineering are free and open to the public. Continue reading "Amgen Seminar Series in Chemical Engineering" Tim Keefe's interest in geotechnical engineering traces back to his childhood when his father taught him how to dig for quahogs in Narragansett Bay. As an engineering graduate student at URI, Keefe is still learning about the properties of soils and other materials Continue reading "Digging for Quahogs Inspired Student to Study Geotechnical Engineering" Two URI engineering professors are developing a device that incorporates paper-based microfluidic valve technology. The small device could be used for pharmaceutical analysis, clinical diagnostics, environmental monitoring and food testing. Continue reading "Two URI Engineering Professors Developing Paper-Based Biochemical Testing Device" By Neil Nachbar University of Rhode Island College of Engineering alumnus Robert Hernandez has been named a recipient of the Presidential Early Career Award in Science and Engineering (PECASE), the nation's highest award for scientists and engineers in the early stages of their research careers. Hernandez earned his master's degree in electrical engineering from URI [...] Continue reading "URI Engineering Alumnus Earns Presidential Award for Scientists" By Neil Nachbar Bryan Reimer, who received his bachelor's, master's and doctoral degrees in engineering from the University of Rhode Island, has been named the 2019 recipient of the Jack A. Kraft Innovator Award from the Human Factors and Ergonomics Society (HFES). The award recognizes those who have made significant efforts to extend or diversify the application of human factors [...] Continue reading "URI Engineering Alum Receives International Innovator Award" Providence Business News recently did a Q&A with URI College of Engineering Assistant Professor Gretchen Macht, who was named to the newspaper's 2019 40 Under Forty list. Continue reading "URI Assistant Professor Gretchen Macht Does Q&A with PBN" The Langer Prizes for Innovation and Entrepreneurial Excellence will award unrestricted grants of up to \$100,000 to assist researchers — particularly those working in chemical and biological engineering — in pursuing ideas that may lead to technical and commercial innovations. Continue reading "AIChE Announces Grants for Innovators and Entrepreneurs" At commencement, McElroy's parents presented him with a college ring, customized to represent his bachelor's degrees in ocean engineering and French, which he completed through URI's International Engineering Program (IEP) Continue reading "URI Engineering Graduate Continues Family Tradition" The results of AIChE's 2019 salary survey revealed a median annual salary of survey respondents of \$126,000, a 1.6% increase over the 2017 median of \$124,000. Continue reading "Salary Survey is Positive for Chemical Engineering Profession" URI has received a \$10 million gift for the new engineering complex from Michael and Elizabeth Fascitelli. The gift will help fund lab and research equipment for the building, which upon completion, will be one of the most technologically advanced in the United States. Continue reading "URI Receives \$10 Million Gift for New Engineering Complex" University of Rhode Island chemical engineering assistant professor Daniel Roxbury received a five-year grant for \$500,000 from the National Science Foundation to develop an entirely new approach to imaging within live cells. The funding was awarded to Roxbury through NSF's Faculty Early Career Development Program (CAREER). Continue reading "NSF CAREER Award Granted to URI Chemical Engineering Professor for New Imaging Technique" The URI Wearable Biosensing Lab will celebrate its fifth anniversary with a special event on July 25, from 1:30 – 3:30 pm in the URI Library's Galanti Lounge. There will be brief presentations of current research projects and networking opportunities. Please RSVP. Continue reading "Wearable Biosensing Lab to Host Fifth Anniversary Event" Kimberly Harrington, who is studying civil engineering and French through URI's International Engineering Program, received a \$1,000 scholarship from St. Mary's Bank in New Hampshire. Only 12 students out of 115 applicants were selected for scholarships. Continue reading "URI IEP Student Receives \$1,000 Scholarship" Kimberly Harrington, who is studying civil engineering and French through URI's International Engineering Program, received a \$1,000 scholarship from St. Mary's Bank in New Hampshire. Only 12 students out of 115 applicants were selected for scholarships. Continue reading "IEP Student Receives \$1,000 Scholarship" Four members of the University of Rhode Island College of Engineering faculty were promoted as of July 1, 2019. Vinka Craver Promoted to Full Professor "I am really grateful to the College of Engineering for giving me the opportunity to develop as a researcher and as a teacher and for recognizing my accomplishments through the [...] Continue reading "Four URI Engineering Professors Receive Promotions" By Neil Nachbar John Grandin, who co-founded the University of Rhode Island International Engineering Program (IEP) in 1987 with former dean of the URI College of Engineering Hermann Viets, received an honorary doctorate in engineering at the University's 2019 undergraduate commencement ceremony. The IEP is one of the most successful interdisciplinary language programs in the country, thanks in [...] Continue reading "URI Bestows Honorary Doctorate to IEP Co-Founder John Grandin" URI assistant professor of chemical engineering Daniel Roxbury talks about the support the NanoBio Engineering Laboratory has received from the RI IDEA Network of Biomedical Research Excellence (RI-INBRE).
